LONGSPAN
SHELVING

Creating Space, Saving Time.

EasySpan
Shelving is
perfect for
goods that
are stored
by hand.

Adaptable, strong and offering great value-for-money, the Shelving Depot EasySpan series could be just the shelving solution you've been seeking for your warehouse, workshop or office.

The Shelving Depot EasySpan Longspan Shelving system is constructed and designed based on the pallet racking concept. With powder coated steel framing for a sturdy and strong finish, **this is cost effective and easy to assemble shelving**. Available in a range of heights and lengths, this shelving system can be tailored to fit the measurements of your warehouse, workshop or office space. With up to ten shelves per bay you are ensured **an efficient, tidy solution to your storage needs**.

With Shelf options of either 25mm MDF Board which slots into the rebated beam or Steel Mesh Panels that fit over the beams the whole structure is automatically squared and straightened. **This system takes just minutes to assemble** and once complete is easily lifted and moved into place. Should your storage requirements increase, **simply add on another bay to extend the unit**, making the Shelving Depot Longspan Shelving an easily customisable warehouse shelving solution for your business.
